Dear Chenfeng Huang,

You have been nominated as a reciprocal reviewer for the Conference on Neural Information Processing Systems (NeurIPS) 2026, either by yourself or your co-authors on your NeurIPS submission, or you are an author on ≥ 4 submissions and are therefore required to serve as a reviewer. We are grateful to your contributions, as reviewers are critical to NeurIPS and to the many communities it serves.

Please note that reciprocal reviewers who do not carry out their reviewing responsibilities risk having their authored submissions desk rejected, as per the NeurIPS 2026 handbook: <https://neurips.cc/Conferences/2026/MainTrackHandbook>.

The current timeline of reviewing is below; please mark your calendars accordingly:

- Paper submission deadline: May 6, 2026
- Reviewer bidding for papers: May 8-14, 2026
- Review period: May 29-June 25, 2026
- Emergency review period: July 6-20, 2026
- Discussion period: July 27-August 10, 2026
- Author notification: September 24, 2026

We expect reviewers to be available throughout the reviewing process with particular emphasis during bidding, the review and emergency review periods, and the discussion period.

TO DO: By May 7th AOE, please complete the registration form that will be visible under "Tasks":
<https://openreview.net/tasks>

If you have any questions, please reach out. For general inquiries and about the main program, email pc2026@neurips.cc.

Thank you for your service!
